

Ontario Climate Change Plan Report Card

FINAL MARK

2/10

AMBITION

- Does the plan include greenhouse gas (GHG) emissions reduction goals consistent with what scientists tell us we need to do to keep warming to 1.5 degrees Celsius?

EFFECTIVENESS

Will it significantly reduce GHG emissions or stop the growth of GHGs from primary sources, including:

- **Transportation:** Does the plan reduce GHG emissions from passenger and freight vehicles?

- **Industry:** Does the plan reduce GHG emissions from large industrial emitters and help them transition to cleaner technology?

- **Buildings:** Does the plan reduce GHG emissions from heating and cooling homes and buildings?

- **Waste:** Does the plan include effective measures to reduce methane emissions from waste?

- **Electricity:** Does the plan include commitments to creating or importing new sources of renewable energy?

RESOURCING

- Does the plan commit enough funds to accomplish its goals?

- Does the plan account for the nearly \$1 Billion remaining from cap-and-trade revenues?

EQUITY & AFFORDABILITY

- Does the plan include incentive or rebate programs to help Ontarians of all socio-economic backgrounds?

- Does the plan commit financial resources to help public buildings, like social housing, schools and hospitals, become more energy efficient?
