

DEAR NEIGHBOUR,

I am dropping off this letter today because The Greenbelt Is Under Threat and we need as many people talking about this and taking action as soon as possible.

Premier Ford repeatedly promised he would never touch the Greenbelt. He lied!

His government now plans to turn 7,400 acres of farmland, wetlands and forests in the Greenbelt into environmentally destructive sprawl.

Taking any land out of the Greenbelt undermines its effectiveness in protecting environmentally sensitive wetlands, forests and other natural areas. It also creates open season on farmland for land speculators and sprawl developers.

There are over 80,000 acres of land already marked for future development and already added to urban and suburban boundaries – we don't need to build homes and warehouses on the Greenbelt.

Let's stand together and keep the Greenbelt protected. You can show your support at handsoffthegreenbelt.ca by:

- Sending a letter to your MPP
- Ordering a lawn sign
- Sharing this letter with a friend or printing your own

Together, we can tell Premier Ford: HANDS OFF THE GREENBELT!
