

# CARBON CAPTURE IS *NOT* A CLIMATE SOLUTION

**TRACK RECORD OF FAILURE** for the last 50 years – most projects fail and those that get off the ground underperform

**EXPENSIVE** technology with costs expected to remain high

Transporting and storing carbon dioxide is risky – accidents are very **DANGEROUS**

**IGNORES 90% OF THE PROBLEM** which is the emissions from burning oil and gas

**HUGE TAXPAYER SUBSIDIES** Governments have caved to oil and gas companies and provided \$Billions, but greedy companies keep asking for more

Excuse to **KEEP PRODUCING FOSSIL FUELS**
