

XVOTE

to Protect Ontario's

Climate

The province is ramping up the use of fossil gas to generate electricity, threatening our health and climate at a time when renewable energy is the cheapest and cleanest choice.

But, we have an opportunity to protect the Ontario we love!

A PROVINCIAL ELECTION HAS BEEN CALLED FOR FEBRUARY 27.

Here are some key facts and questions to share with your local candidates when they come to your door.

- X** Greenhouse gas pollution from Ontario's gas plants is set to rise by 400% by 2030 and 800% by 2040 unless action is taken.
- X** Gas power is a major contributor to climate change, emitting carbon dioxide and methane, a highly potent greenhouse gas.

- X** Gas plants release nitrogen oxides, which harm human health.
- X** Renewable energy is cheaper than fossil fuels.
- X** Will your party commit to phasing out fossil gas and investing in clean energy solutions, including renewable energy, battery storage and energy efficiency?
